## THE WORLD OVER

WHEAT SITUATION REVIEW

CANADA LIKELY IMPORT WHEAT

CANADA SELLS FRANCE WHEAT

INFORMATION ABOUT RUSSIANS

Last winter the province of Ontario experienced the coldest weather in generations. The thermometer ranged away below zero for weeks on end. This resulted in widespread damage to the wheat crop (Ontario grows winter wheat almost exclusively) and now millers are faced with a decided shortage of soft wheat for pastry flour, thus the saving paradox appears that Canada which supplies around 250,000,000 bushels of wheat having to import some. It is probable that Great Britain or Australia will be called on to fulfill the deficiency as this wheat can come into Canada free of duty while importations from any other country, including the United States just across the line from Ontario, is 20 cents a bushel.

The Australian farm paper "The Land" calls attention to the fact that Canada supplied 48 per cent of France's wheat importations for the past year. This percentage represented 11,846,738 bushels. The "Land" remarks that Australia used to have a fairly steady trade with France in wheat that the slump came in the five years ending 1928 Australia sold France an average of over 5,000,000 bushels a year. In 1929 this trade has fallen almost to the vanishing point when Australia's year or two ago imposed embargoes and prohibited French goods. France retaliated. At present the duty on Australian wheat going into France is \$125 a bushel in Australian money. This is more double the duty imposed on wheat from any other country. The "Land" says: "It is plain that our tariff policy has killed what wheat trade we had with France."

The purchasing of several cargoes of wheat by Soviet Russia from Australia and Argentina is the cause of considerable comment during the last

## W. WEBBER DID NOT DIE FROM POISON FUMES

William Webber, son of Mr. and Mrs. George Webber, died from toxicosis from general peritonitis following perforation of the appendix, and not from the effects of handling grasshopper poison, as was first believed and stated in our last issue.

This was established by a coroner's jury last Friday night after hearing evidence of Dr. T.R. Ross, his physician, and Dr. Louis Melatchie, Calgary, who performed the autopsy.

Dr. Ross said that when he found out the late Mr. Webber had been mixing poison, using his hands instead of a spoon, he felt it was his duty to inform the coroner in case it might be investigated thoroughly. Dr. Melatchie found no trace of arsenic.

Coroner Dr. G.M. Gibson, at Drumheller where the inquest took place, advised the jury he did not think it was necessary to call any other witnesses, under the circumstances, while none other were present at the inquest.

The jury, consisting of Drumheller men, T. R. Ross, Esq., J.A. Cunningham, J. G. Dewar, James Brown, W.W. Glenister and P.O. Smith, took a short time to bring in their verdict.

week. It appears that this wheat is destined for Vladivostok and two cargoes were purchased from Australia while Argentina supplied another two shiploads. Some British newspapers are of the belief that it is only the dire need of credits abroad that makes Russia an exporter of wheat at all and it is claimed that if longer term credits could be arranged she would abandon the wheat export business. Russia is maintaining several army corps in the Far East and British newspapers point out that it is cheaper to buy wheat abroad to supply the requirements of the army rather than to haul it over the long Trans-Siberian Railway.

## Govt. To Provide Relief For Debt-Ridden Farmers

A step of vast importance was taken by the government early this week when a measure was introduced in the House of Commons to grant a measure of relief to debt-laden farmers. The purpose of this act is to facilitate compromise between farmers and their creditors and in this way to enable the farmers to remain on the land as producers.

A feature of this legislation will be that farmers may initiate steps to obtain relief from debts without going through any expensive process, as the costs of the debt adjustment legislation will be defrayed by the federal government.

The debt adjustment measure provides for the setting up in each judicial district of an official receiver to whom the farmer will be required to go in the first instance to obtain relief. This receiver will take steps to arrange a compromise between the debtor and his creditors. If this cannot be done a provincial board of review will take up the matter and render final decision.

It is understood that funds will be available to provide refunding of the loans made or at the least mortgages at comparatively low rates of interest.

## WHAT ABOUT SOCIAL CREDIT, CANADA?

This series is an explanation of the Douglas Social Credit Plan. Mr. Williams (W) a Social Credit advocate, is explaining the plan to his friend, Mr. Jones (J). The scene is Mr. Williams' home, and the conversation takes place during an evening visit.

"W. 'This National dividend' may be called 'the wages of the machine' and if you recollect we have just been discussing the increased productivity of the community through the use of the product of centuries of co-operation and the gradual increase of knowledge. Here is how one New Economist puts it: 'This net increase is the result of the community's collective labors, and in a private company they would be termed a profit and be distributed among the shareholders as a dividend. Even so in this case it is the National profit, not the one distributed as a dividend of financial credit to the nation's shareholders—its citizens—all of whom have contributed through some channel or another to its making and are entitled to participate in the distribution. If no such distribution of financial credit or purchasing power is made then this increase in a community's capacity to produce is of no benefit to that community because it cannot be drawn upon. Today the banker creates licenses in the form of credits (money) to drive upon this hidden National Hoover Fund, and lends these to the real owners and creators of the fund at a retail called interest. The financier thus makes himself the potential owner of the national increment of association."

J. "Oh, but bankers don't lend credit to themselves in order to get goods."

W. Of course not; who said they did? The question I just read makes that this supply of potential wealth cannot be utilized unless the banker creates credit in order to bring these goods into the commercial system, seeing that he has the money of credit he has a monopoly of the potential wealth and it is only through him and through the financial system which he controls that it is possible for the community to have access to this store of wealth."

J. "You mean that the prosperity of a country depends largely upon banking policy?"

W. "To a great extent, yes."

J. "Reading the Hansard report of the evidence given by representative bankers before the Banking Committee at Ottawa, one cannot find that they admit this."

W. "No, I suppose not. Neither do they have very often a brewer admitting that his product may be injurious to the community. But we are wearying away from the subject of the National Dividend. Are there any questions you want to ask about this?"

J. "Yes there are a lot of things I want to ask you but I wanted to be that all you are waiting for; you're

## PROGRAM OF THE ALBERTA CONVENTION BEING HELD AT THE BETHEL CHURCH

The Alberta Convention is being held at the Bethel Church, five miles south of Carbon on the east road, from June 13th to 17th.

Starting at 7.30 Wednesday evening.

## TENNIS NOTES

RESULTS OF INTER-CLUB TENNIS COMPETITION, DISTRICT NO. 5

Four ties were played in the inter-club competition of the Alberta Lawn Tennis Association, District No. 5, on June 10th, at the Men's Section. Drumheller "B" defeated Drumheller "A" three sets to two. Carbon "A" defeated Carbon "B" three sets to one. Drumheller "A" defeated Carbon "A" three sets to one. Drumheller "B" defeated Carbon "B" three sets to one.

The following are the results and scores:

Men's Singles—W. Swan, Drumheller A defeated B. Glenister, Drumheller B, 6-2, 6-2. F. Storch, Drumheller A defeated N. McCure, Drumheller B, 6-2, 6-2.

Men's Doubles—Melville & Glenister, Drumheller B, defeated Swan and Whistler, Drumheller A, 3-6, 6-4, 6-2. McCure and McDonald, Drumheller B, defeated Whistler and Hooper, Drumheller A, 6-3, 6-4, 6-2. Melville and McLeod, Drumheller B, defeated Hooper and Storch, Drumheller A, 5-7, 6-2, 10-8.

Carbon Defeated Healeth

Men's Singles—W. Paxon, Carbon A defeated L. Brown, Healeth, 6-2, 6-4. Right, Wase, Carbon A, defeated J. Rigwood, Healeth, 6-4, 6-0.

Men's Doubles—N. Nash and R. Wise, Carbon A, defeated L. Brown and L. Saunders, Healeth, 6-0, 6-2. W.L. Paxon and J.C. Spence, Carbon A, defeated J. Neilson and L. McDonald, Healeth, 6-0, 6-0.

Carbon "B" Plays at Acme

Men's Singles—N. Nash, Carbon "B" defeated G. Wheeler, Acme, 6-2, 6-4. H. MacDonald, Carbon "B" defeated C. Smith, Acme, 6-2, 6-0.

Men's Doubles—N. Nash and Cyril Paxon, Carbon "B", defeated J. Perrie and G. Brown, Acme, 5-6, 6-4. H. MacDonald and G. Ramsey, Carbon "B", defeated C. Smith and G. Brown, Acme, 6-2, 6-4, 6-2. M. Moore, N. Ramsey and R. Reed, Carbon, defeated M. Moore and R. Hosenpiller, of Acme, 6-2, 6-4. M. Moore, N. Ramsey and A. Wise, Carbon, defeated M. Moore and R. P. Fowler, Acme, 6-4, 1-6, 6-4.

Carbon From Acme in Women's

Women's Singles—Miss M. Ramsey, Carbon, defeated Miss P. Fowler, Acme, 6-4, 6-1. Miss A. Wise, Carbon, defeated Miss R. Hosenpiller, Acme, 6-1, 6-0.

Women's Doubles—Misses N. Hemming and R. Reed, Carbon, defeated Misses R. Fowler and M. Goodrich, of Acme, 6-4, 6-2. Misses M. Ramsey and R. Reed, Carbon, defeated Misses M. Goodrich and R. Hosenpiller, of Acme, 6-2, 6-4. Misses N. Hemming and A. Wise, Carbon, defeated Misses P. and R. Fowler, Acme, 6-4, 1-6, 6-4.

Carbon Wins at Acme in Tennis

J. "Oh well, I might as well ask you to give your definition for I know happened in some countries but that does not answer my question very satisfactorily. You have just told me certain characteristics of a 'violent inflation' but that is not the point. I want to know first that there was a sound basis for the National Dividend itself. By the way, I suppose that the National Dividend will be issued by the National Credit Authority, as I think you called it."

W. "Yes, and it will be debt free money."

J. "What do you mean?"

W. "That it is not borrowed money. It is a credit of new money."

J. "But that will produce inflation?"

W. "At last it here! You mentioned inflation once before during the evening but we seemed to forget it at the moment. You now again drag in that awful boggy-inflation."

J. "Well, don't you fear inflationary practices? Look at Germany and—"

W. "Wait a minute. Let's get this straight. What is inflation?"

J. "Why, everybody knows what inflation is! It is when your money becomes worthless and prices rise sky-high. You and your boy are running away from the subject of the National Dividend. Are there any questions you want to ask about this?"

J. "Yes there are a lot of things I want to ask you but I wanted to be that all you are waiting for; you're

## BANK OF MONTREAL CROP REPORT ISSUED JUNE 7

General.—The serious crop conditions which were developing most of the Rocky Mountains owing to unusual dry weather, accompanied by a heat wave, have been changed for the better, so far as the prairie provinces are concerned, by heavy rains over most of the western plains during the past few days. These rains have checked grasshopper invasions, improving the general situation which was becoming critical over the southern portions of the three provinces. In Quebec Province warm weather and rain are helping to promote the growth. As a whole spring operations have been carried out under favorable conditions and in general the acreage planted is larger than was the case last year. In Ontario seedling of spring grains has been completed but owing to an insufficiency of moisture growth has been retarded. In all districts rains are urgently needed. In the Maritime Provinces the season is well advanced and there are rains with warm weather are required. In British Columbia growth has been rapid under favorable conditions. Crops continue to be about three weeks ahead than usual.

Northeastern Alberta.—What is now showing healthy growth, moisture is ample and conditions satisfactory.

Southeastern Area.—The crop which was damaged by May drought has been benefited and the grasshopper plague has been checked by recent rains.

Western Alberta.—Seedling is making good progress, and the shortage of moisture in the foothills has been alleviated by heavy rains. The sugar beet crop is well advanced.

The first speaker will be Rev. John Brander of Calgary, who will address the gathering on the first evening.

Thursday, June 14th at 9:15 a.m. the meeting will be opened by G. Hertz and business of the Church will be discussed.

At 1:15 p.m. a musical program will be given, conducted by A. Just, after which the business of the church will be resumed.

In the evening a service of song and praise will take place at 7:30, conducted by A. Unger, followed by Rev. Hertzman.

Friday, June 15th at 9:15 a.m. there will be a musical program conducted by A. Justman, followed by Rev. E. Brade and Rev. Philip Daum.

In the afternoon from 2 p.m. to 4 p.m. the first speaker will be Rev. John Brander of Calgary, who will address the gathering on the first evening.

Thursday, June 14th at 9:15 a.m. the meeting will be opened by G. Hertz and business of the Church will be discussed.

At 1:15 p.m. a musical program will be given, conducted by A. Just, after which the business of the church will be resumed.

In the evening a service of song and praise will take place at 7:30, conducted by A. Unger, followed by Rev. Hertzman.

## MRS. McNICHOL DIES FOLLOWING A LONG ILLNESS

Word was received in Carbon on Monday morning of the death of Mrs. Georgina Kerr McNichol wife of Rev. Wm. McNichol, United Church minister of Carbon, who died Sunday evening in a Ponoka hospital following a lengthy illness.

The late Mrs. McNichol came to Carbon with her husband in July, 1912, and resided here up until about 18 months ago, when she was confined to the mental hospital at Ponoka for treatment, and while in that institution she passed away on Sunday evening.

Deceased was 67 years of age. Surviving are her husband, Rev. Wm. McNichol, Carbon; one sister, Mrs. Helen Nicholson, Ottawa; and one brother, Dr. Hyles Nicholson, Vancouver.

Funeral services were held Wednesday afternoon, June 13th, at 2:30 p.m., at Carbon, from the family residence and were conducted by Rev. H. H. Magowan. Interment was made in Burialwood cemetery.

P.m. the meeting will be conducted, conducted by the Rev. A. Kramer of Edmonton, and Rev. F.A. Muller, of Carbon.

In the evening at 7:30 a musical program will be presented by R. Neale, after which the Rev. F.W. Heale will address the meeting.

Saturday, June 16th commencing at 9:15 a.m. the meeting will be opened by Henry Poxon, Calgary, and Rev. A. Kramer. From 2 p.m. to 4 p.m. Rev. Philip Daum will speak. At 7:30 p.m. the Rev. A. Kramer will conduct the service.

Sunday, June 17th, at 9:30 a.m. Sunday school will be held with superintendent E. Bettecher in charge.

From 10:30 a.m. to 12 o'clock Rev. A. Kramer and Rev. Philip Daum will speak on Foreign Missions.

From 2 p.m. to 4 p.m. the Rev. F.A. Muller will speak in German, and the Rev. E. B. Thole will speak in English.

At 7:30 Holy Communion will be conducted by the Rev. John Brander and Rev. Philip Daum.

Everyday will be welcome each afternoon and evening, when luncheon will be served by the ladies of the church at 2:30 p.m. and 7:30 p.m.

## Thrifty Housewives Buy Quality

"Fresh from the Gardens"

## That "Bought And Paid For" Idea

There is a curious persistence in the idea current in certain parts of Western Canada, that the older provinces of Confederation have proprietary interests in the prairie provinces by "rights of purchase."

Just recently, a storm which ranged West against East, broke in the House of Commons at Ottawa, when relief and other expenditures required by Western Canada were under consideration. During the discussion, the "bought and paid for" mentality was prominently in evidence, according to newspaper dispatches. It appears inevitable that, when any expenditure which may be construed as exclusively Western, is considered in the parliament, some member from one of the older provinces, impelled by this idea, seems bound to object on the ground that the prairie provinces are not entitled to further consideration—and terms such as "blood-suckers" are applied, indiscriminately and with reckless abandon, to governments and people of the West.

Forgotten in the heat of debate is the amazing part which the West has played in the material advancement of the Dominion. Forgotten, for the time being, is the gigantic contribution which the wheat-growing prairies have made to the wealth of Canada. Forgotten are the tremendous expenditures made, by the Dominion as a whole for works, projects and purposes which may be considered as exclusively Eastern. Forgotten is the use made of the resources of the West in the building of great transportation systems of advantage to the whole of Canada. Forgotten is the influence of prairie purchasing power upon the industrial development of the East. Forgotten, lastly, is the fact that the West's present needs are due to the dire extremity of many of its people—a condition they certainly did not seek and did nothing to create. The "right of purchase" idea reigns paramount over all others when tempers are frayed and local zeal is in the ascendency. In one breath it is admitted that the prairie section has contributed more to the wealth of Canada in a specified period than any other component part of the Dominion. In the next, the prairies are branded as "blood-suckers," draining, as it were, the coffers of Canada which, by implication, apparently are lily white by the contributions made by the older, Eastern provinces.

The idea, of course, has its roots in the historical charter granted by Charles II. of England, in 1670, to the Hudson Bay Company, which conferred upon that company "rights in the territory tributary to the rivers draining into the Hudson Bay Company. The British Government, these rights the company exercised in the territory known as Rupert's Land for some two hundred years.

When, however, Confederation became an accomplished fact in 1867, the Canadian parliament, pursuant to the great vision of a united Canada stretching from ocean to ocean, initiated negotiations with the Imperial Government at London with a view to acquiring possession of the territory held under this charter, and Canada stretched one and indivisible from the Atlantic littoral to the Pacific seaboard. That is the story, that the genesis of this "bought and paid for" idea which crops up, ever and anon, during debate in the federal parliament.

Obviously, \$1,500,000 is a ridiculously small sum against which to assess a claim of proprietary rights of purchase in the entire prairie section of Canada. It is ridiculously small not only in proportion to the wealth produced normally each year in the farming wheat field of the West. It is ridiculously small not only in proportion to the contribution made by the "purchaser" territories to the aggregate wealth of the Dominion. It is ridiculously small in comparison to the expenditures made by the Western provinces to the revenues of Canada. That the idea should survive at all in the face of recent history is incomprehensible to Western minds. That it should be used to justify opposition to present claims of certain sections of the province for aid in their extremity, demonstrates not only the mental poverty of the objector, but a naive ignorance of obvious facts. Recent economic experience has proved that, instead of the East helping the West in its foe, the reverse is closer to the truth.

## Italy To Build Battleships

## Three Large Fighting Ships To Be Built Under Washington Treaty

Italy will construct three large battleships with general specifications similar to those of the French battleship Danguet, which was disclosed by naval officials.

The new vessels will be completed by 1940 and will cost about \$85,000,000. Their construction will be under a program outlined by Premier Mussolini in an address before the chamber in which he stated that Italy proposes to utilize the 70,000 tons allowed Italy under the Washington treaty.

The premier estimated the expenditure will total 3,000,000,000 lire. This capital expenditure will be in addition to appropriations made to modernize old battleships between 1930 and 1940.

## Life-Saving Ducks

## Battled Roam Companion And Rescued It From Mud-Turtle

Many lads have a lot more sense than people give them credit for, according to a man from Minnesota. He tells us that he saw a duck in a huddle in the middle of the little lake on his farm. They were setting up such a clatter that he took a rowboat and went out to see what was a duck more than half under water being dragged down by a huge mud-turtle that held it by its foot. The other ducks were peaced as close as they could get in an effort to hold it up as long as possible, meanwhile sending out distress calls as best they could. A rescue was effected and the ducks dashed.

## Household Drudgery

## The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman have good health when she has to go through the household drudgery without any relaxation. It is any wonder she becomes nervous and irritable, has bad headaches, faint and dizzy spells, shortness of breath, sinking and smothering sensations, and can't sleep at night.

Women who are weak and run down will find in MILBURN'S HEALTH NERVE PILLS a remedy to strengthen their system and bring back the much desired health.

MILBURN'S HEALTH NERVE PILLS

## World's Largest Flying Boats

## Russia Leads With British Second And United States Third

Like everything else airplanes are becoming larger and more powerful. The honor of having the biggest goes to Russia.

The Russians have almost completed at Moscow a flying boat—it might be called a flying liner—to be named the "Mach Kora." It will provide accommodation for 70 passengers, and will have a crew of six. It will have a moving picture "auditorium," and a room for displaying photographs. The pilot will sit in a control tower above the wings so that he will have an uninterrupted view. Great Britain furnishes the second largest, the "Rylla," which is almost ready. It will carry 30 passengers and a crew of five. Among other things it will have a smoking compartment.

The United States has a boat with the 5-4-2 built at Bridgeport, Conn., by the Sikorsky Company. It carries 22 passengers and a crew of six. It has a maximum speed of 150 miles per hour, and can also carry 1,000 pounds of freight.—St. Thomas Times-Journal.

## "PERSONS NOT FAT LIVE LONGEST"

## Eminent Physician Declares

In a recent lecture before the American Association of Medicine, a prominent physician stated that persons who aren't fat live the longest.

Common sense confirms this. Insurance companies charge higher premiums on account of the risk. Fat crowds and weakens body organs. It slows you down and puts unnecessary strain on the heart. A host of ailments (even rheumatism, acidity, shortness of breath and leucitis) are often associated with fat.

So get rid of this dangerous, unhealthy fat. There's no reason why you shouldn't, when science has given you the means. A half teaspoonful of Kruschen Salt in a glass of hot water first thing every morning.

This healthful "little daily dose" of Kruschen keeps the system free of harmful toxins. It helps to re-establish normal intestinal functioning—it keeps you feeling fine and fit all the time. Forgetting only the place of strength and invigoration all while you lose excess fat gradually and without discomfort.

## Vaccine For Tuberculosis

## New Preparation Being Tested On Cattle In Ireland

Experiments to find a cure for tuberculosis in cattle continue in various parts of Europe. The Spahlinger vaccine, of which much was heard two or three years ago, will undergo further tests. The vaccine of which has been made in Northern Ireland under official auspices. The calves vaccinated with the Spahlinger vaccine have survived the injection of heavy doses of tubercle infection and are thriving, while untreated calves have succumbed.

As the United Kingdom is now embarking on a campaign to clean up her dairy herds and to eradicate tuberculosis, the final results of the Ulster trial seem likely to offer an economical and practicable means of immunizing dairy cattle against tuberculosis and gradually reducing the country of a scourge which is costly to public health and farmers.

## Dwarfs Holding Congress

## Likely To Take Place In Budapest

Fired by the Nazi doctrine of racial purity, dwarfs of Hungary have formed a National Union of Hungarian Dwarfs and have elected all the dwarfs of the world to a Dwarf Congress which is to be held, probably in Budapest, next year. Their chief aim is to "preserve the purity of the dwarf race," to forbid marriage with normally-abled people, and to demand that the law should provide for their education and for their labor. Their leader, their Hitler, is said to be 30 inches tall.

## Invention For Radio Fans

Dr. Nevil M. Hopkins, of New York University, is inventing a new electrical device which he claims will revolutionize the radio broadcasting industry. He calls it the "telecorder" and by use of this instrument, a listener on a broadcast can, by pressing a button, immediately transmit to the station his reaction to the program being presented.

All tree squirrels make nests of twigs and leaves among tree branches.

## Fulfilling Father's Hopes

## Captain Scott's Son Makes Study Of Natural History

Twenty-two years ago Captain Scott one of the greatest English explorers of all time, lay dying in a tent in the Antarctic.

The last letter he wrote was to his wife. He spoke of their young son Peter. "Make the boy interested in natural history if you can," he said.

Peter Scott is 24 now. He has fulfilled his father's hopes. Recently he opened in Bond street, London, his second exhibition of paintings of bird life.

The grey light of dawn is there to see the mudflats, the sinuous creeks, the ebb of the tide, and eerie, plaintive noises. The curlew calls; you can hear the piping of awakening redshank and stint. Grey geese V-shaped into the sky and flight shoreward to the fresh marshes of the mainland.

It is a world of thrills to the mere wildflower. It is a world of exquisite joy to the birdlover, waiting for the first bird to fly, which is what Peter Scott has become.

He shoots little now, as he said recently, but night and day, the winter through, lies in a scope-out hole in the Wash, or huddles in a pit to get a closer view of the birds. The fleeting visions he has captured in paint.

## The Grasshopper Campaigns

## Provincial And Federal Organizations To Deal With Menace

The Canadian Insect Pest Review for May of the Dominion Entomological Branch in the 1933 summary of insect outbreaks of that year states that reference to grasshoppers and control campaigns involving the use of poisoned baits were actively carried out in most areas, and despite many difficulties, resulted in the destruction of vast numbers of grasshoppers and the material saving of crops. To July and August, extensive dispersal flights of grasshoppers occurred in many parts of the infected region. As a result, practically all of the open prairie land of the three Prairie provinces is now involved, and the areas of severe infestation have been considerably extended, except in Eastern Manitoba where there was an encouraging report.

It is expected that during 1934 the outbreak will be even more intense and destructive than that of 1933, and consequently Provincial and Dominion authorities are organizing a comprehensive campaign to deal with it.

## Dredging For Gold

## Work To Be Started On Jugoslav-Rumanian Border

Modern miners are to attempt to dredge the River Pek on the Jugoslav-Rumanian border, on the river which has been collecting for more than 2,000 years. Up this river sailed Jason and his Argonauts from the Black Sea, and the Queen Sifoe of their quest is no legend to today, for the peasants of the Pek River Valley steep shepherds in the water and after a few weeks put out golden fleeces, the alveial gold brought down from the mountains by the water having settled in the wool. It was here that Alexander found all the gold for his expedition in 328 B.C. Firms of many nations have made bids to supply the dredging machinery and the operations are expected to be extensive.

## A Closely Guarded Secret

Germany is closely guarding its experiments with radio-controlled flying machines. It is reported that successful flights were made by a machine entirely without a crew, direction being entirely by radio. The machine has been made a great secret, and officials refuse to divulge any information.

"Too bad about Jane and the man she's engaged to. Neither one of them is good enough for the other. "Where did you get that idea?" "I've been talking the matter over with both families."

The world is wide, but there are lots of narrow people in it.

## Still Works At Ninety

## Blacksmith Not Idle Even If Son Runs Business

Partnership of Kemp and Son, village blacksmiths at Wellington, worth, England, has been, to quote the official notice, "dissolved by mutual consent," but a man who worked hard as a blacksmith even in his nineteenth year will not be altogether idle. It was not lack of business that caused the firm to dissolve. Far from it, but simply that Samuel Kemp was 90 and came to the opinion that his boy, James, was not enough to carry on. Samuel Kemp, however, does not intend to retire, "because," he says, "you can't trust these boys." He has finished 78 years continuous work at the forge. Up to the time the official notice of the dissolve partnership was published he was using a sledge hammer. Next day he was soldering kettles.

## Canada's Agricultural Revenue

## Decrease Last Year Of Over Four Million From Previous Year

The total gross agricultural revenue of Canada for 1933 is estimated at \$762,302,000 as compared with revised estimates of \$766,794,000 for 1932, and \$836,114,000 for 1931. This represents a decrease of \$44,920,000, or 6.8 per cent, from 1932. There are increases in revenue from farm animals, wool, dairy products, fur farming, honey, clover, and grass seed, and decreases in revenue from field crops, fruits and vegetables, poultry and eggs, maple products, tobacco, and fax fibre. The greatest increases are from farm animals and dairy products, while the biggest decreases in revenue are shown in field crops and poultry and eggs.

## Greatly Increased Riches

## Higher Gold Price Made Vast Difference To Indian Prince

It is due largely to President Roosevelt that an Indian prince, the Nizam of Hyderabad, is much richer than he was a year ago. Locked up in his strong-box was a vast quantity of gold in bars and bullion. Early last year its value was estimated at \$500,000,000. Since then the price of gold has increased about 90 per cent, as a result of the action of the United States in fixing a higher price for gold. The Nizam's hoard is now estimated worth \$800,000,000.

## Has Regular Zoo

Pity the prowler who breaks into the room of Kenneth Johnson, University of California student. Johnson, who appears to be a zoo keeper, keeps eight snakes, a black widow spider, and a Gila monster in his bedroom. The pets have the run of the bedroom. Johnson says the best way to make them happy, and improve their intelligence by running them through mazes.

## Good Friend To Horses

When Policeman M. Elwood prosecuted John Hill, a groom, for cruelty to a pony it made the 103th equine he had befriended in court. Elwood has been on the London force for 20 years. A lover of horses, he watches for cases of cruelty and brings the offenders before the law.

## Dreams Of A Startling Future

## Nicola Tesla On verge Of Announcing New Discoveries

It is all very hazy, of course, but when Nicola Tesla says he "is on the verge of announcing a new invention of incalculable benefit to the world," the world is warranted in sitting up and taking notice. For the wonders that Tesla has performed in the past are to be considered as an indication of the wonders he may perform in the future. The Italian genius says he is prepared to startle the world with four new inventions which are likely to provide him with many millions. With these millions he will proceed to put some of his earlier discoveries on a commercial basis. Chief among these, we take it, he rates the transmission of power by wireless. Tesla remarks that with his discovery put on a commercial basis, the flying machine of tomorrow, freed from the gasoline motor, will have unlimited cruising radius by drawing on transmitted power. And, of course, that will be only one of many possible wonders. Electricity directed to terms of power already enters into our daily lives in many forms, and the field awaiting development of Tesla's wireless power transmission is practically without limit. So, although we say we are at the outer edge of the announcement is somewhat hazy, it is clear enough to start vivid dreams of a startling future.—Buffalo Courier.

## Belgium Looking To Her National Defence

## Joins Countries Who Have Given Up Disarmament Idea

Add Belgium to the list of countries, large and small, which have abandoned all talk of disarmament and are concentrating on the reverse. In Belgium the chief political issue just now seems to be the exact nature of the policy of national defence which will be adopted. Within the past year and a half this small power has spent no less than \$50,000,000 in developing its armaments. The ideal of bigger and better armaments, which may in the end mean death to a great many, but in the meantime, it is at least helping the armament concerns to maintain production at a satisfactory high level.

Islands in a river, unless caused by rock outcrops, are continually travelling downstream as the current cuts at the upstream end of the island and deposits at the other end.

There never yet was a person that beat a good example.

## THE FLU-FU BIRD

You young fellows just out of high  
school. You have had a tough time  
the last two or three years. You were  
anxious to get work. Nothing opened  
up. You felt you were butting your  
head against a stone wall.

The Star passes on to you a phrase  
it saw the other day—to you and to

the others who will join your ranks  
in the spring.

That phrase is "Yesterday is dead!"

The country has been bogged down  
before. It is going to pull out shortly.  
Just as it has always pulled out. But  
mark this. Business is not coming  
back just as it was before. It never  
does, after going through the wringer.

A lot of the old leaders and the old  
methods have passed out. A new  
bunch of aggressive and resourceful  
young fellows will come stomping up  
to grasp new opportunities.

For yesterday is dead!

New opportunities, mind you. Not  
the opportunities of the last decade.  
Those are gone. If experience is a  
guide, recovery will not come in an  
orderly fashion, along old lines. Keen  
men will see business chances here  
and there even while things are at  
a low level. Chances that arose out of  
the depression with its changing de-  
mands.

Perhaps these will lie in new pro-  
ducts of science, in inexpensive nov-  
elties, in house cooling, in cheap farm  
lands. Men who live in the past will  
overlook these opportunities. They  
will be thinking of things as they  
were in 1929. So they will fail to see  
the new conditions and take advantage  
of them.

But the alert young crowd will  
jump at the new chances, develop  
them, build up with them as business

not really interested in a definition  
from me."

W. "Now, Jones, don't be like that!"

## Here and There

One graduate of the Anglican  
Theological College of British  
Columbia and four undergraduates  
are out for a summer of  
adventure and color since em-  
barking recently aboard Canadian  
Pacific coastal liner, "Princess  
Norah" for the Yukon. Her 100-  
odd passengers also included  
miners, prospectors and northern  
railway and steamship men going  
in for the season.

Portland, Oregon's 25th annual  
Rose Festival, world-famous for  
colored pomp and pageantry, will  
be held June 11-14 next. The  
western zone of the Canadian  
Lioness will hold its convention  
there as also the American Rose  
Society.

The Princess Elaine, popular  
Vancouver-Nanaimo ferry of the  
Canadian Pacific B.C. Coast  
steamship service, is back from  
overhaul with the very latest in  
lunch rooms installed aboard. It  
is 40 feet long and 15 feet wide,  
and is provided with lunch coun-  
ter and tables.

General improvement in busi-  
ness is apparent throughout Can-  
ada although many problems still  
remain to be solved in the opinion  
of Jackson Dods, general man-  
ager of the Bank of Montreal, who  
sailed for Europe aboard the Em-  
press of Australia recently.

The Canadian Pacific 47,500-ton  
Atlantic flagship Empress of  
Britain completed her world  
cruise of 20,000 miles last month  
arrival at New York and sail-  
ed again for Cherbourg and  
 Southampton to be fitted for her  
normal season sailings between  
Southampton and Quebec.

An English bullion, Scotch ter-  
rier, two boxes of swan's eggs  
and four boning pigeons were  
among the Canadian Pacific Ex-  
press shipments arriving at Que-  
bec recently aboard the Empress  
of York from Liverpool, Belfast  
and Glasgow.

"With a soundly administered  
united system, Canada would be  
able to anticipate within a rea-  
sonable period of time, a balanced  
railway budget and would be able  
to finance any justified expan-  
sions which expanding settlement  
and development might in future  
demand." E. W. Bentley, R.C.  
chairman and president of the  
Canadian Pacific Railway, declar-  
ed in a recent speech advocating  
unification for administrative  
purposes of the two major rail-  
ways.

Have you really got a definition for  
inflation?

J. "Well no—I suppose I haven't."

"Well all right. Here is our idea of  
inflation. Inflation is an increase in  
money without a corresponding in-  
crease in the amount of goods avail-  
able for sale. Now bankers have a  
different idea about what constitutes  
inflation. They use the word to refer  
to any loose of money in excess of  
the amount usually issued against a  
gold basis. The funny thing about this  
is that, as we have seen, every time  
they make a loan they are causing  
inflation, and vice versa. But all this  
discussion of inflation is purely theo-  
retical and academic unless it has  
some definite effect upon the indi-  
vidual citizen. You mentioned the  
fantastically high prices during the de-  
pression inflationary period. Well, that is  
the only thing that affects the indi-  
vidual—that is the price he has to  
pay for goods. Unless prices rise, in-  
flation is just an idle term, and can  
not be of any interest to the average  
man. When inflation in the ordinary  
sense of the word takes place there  
is a corresponding increase in the  
amount of goods available, that is,  
there is no real basis for the extra  
money. The National Dividend and  
the Just Price discount, on the other  
hand, would be drawn from out debts  
to the national credit which repre-  
sents the real wealth of a country."

## Chinese Royalty Visits Canada

Crossing Canada as their fastest way of reaching the Orient to join an imperial relative at his court,  
Princess Junho, her husband, T. E. Cheng, and their little baby are seen as they arrived  
in Halifax recently in the Canadian Pacific liner Duchess of Richmond. Princess Junho is the second  
daughter of Emperor King Teh, the young man who as an infant was proclaimed Emperor of China and  
is now Emperor of the Manchukuo, the Manchurian state created by Japan.

Little Ying Tsai, eighteen month old daughter of Princess Junho, was born in London, where  
her parents have lived in recent years. The princess and her husband both speak English perfectly,  
and are seen to be similarly attired in European clothes. Holding rose-scented and pretty Ying Tsai  
is Miss Florence Kilham, a stewardess in the Duchess of Richmond, who had care of the little girl  
during the voyage across the Atlantic. The party sailed from Victoria April 7 in the Empress of  
Canada.

stones and melted as inconspicuously. No one cared particularly about the merits of the sculptured figure, the pertinence of its title or the success of the creator. They were much more intent upon the blithely which this occasion afforded them and the liquid refreshment which awaited them across the hall.

There was no time lost when they arrived. Cocktails were passed immediately. Toasts were drunk to the speaker and to his work, to his success, to the one who had named the toast, to every possible occasion—except Camilla. She was as useless as the veil which had shrouded the figure and was cast aside. She had no right, had indignantly commanded Peter's favor, usurped the privileges of another—and now shared in the momentary triumph as if she belonged to him.

It was Avia with whom he danced first, out of duty and gratitude; Avia who clung to him as possessively and discovered any number of reasons to prevent his dancing with any other girl.

Though the rooms were comparatively small, Camilla was not near enough to speak to him in an hour. She observed, wistfully, that his obsequious attentions to Avia did not appear to be at all reciprocal. But she chided herself for her jealousy and tried to be gay.

When she finally did speak to Peter, she danced with him. He was, she heard him, exclaiming, "It's too warm and crowded in here to dance. I've had enough of it. Gosh! I'm tired out!" Here, Terry, take my wife. Terry was to dance.

He was most obliging, while he gave her five calculations of his own. Give the Anasno another year, and he would have another chance to win Camilla. But he said casually, "Peter, look out! Gosh! I'm tired out!" Here, Terry, take my wife. Terry was to dance. He would have been more considerate of Avia to let her rest instead of giving this party. I should think it would have been better to wait to celebrate when the prize is awarded.

"But Peter may not win, then she couldn't give a party," Camilla decried, for effect.

"That's right, well, any party that gives me a chance to dance with you is okay, anyway. And do miss you in our crowd! I'm not the only one here, but I'm at the top of the list."

She laughed with indulgence. "It is not to be missed, but I am much happier now than I ever was, much as I like you all."

"Sure about that?" quizzically.

"Why of course!"

"And what will you do if Peter goes to Paris?"

"I will wait to decide when he goes," she laughed, "but I shan't have much time for gawdy. I'm sure. I shall be very busy with my own work."

Just then Peter danced by with Avia, ostensibly enjoying himself. He was indeed inclined to do so, but his lips, intent upon what she was saying. He laughed, and their eyes met with an intimate air of understanding.

Camilla's heart stood still for a moment, and she felt like a figure moving about the room propelled by Terry's arm. He said something that she did not hear.

"Oh, splendidly."

"I'm sorry," she apologized.

"Oh, how is your work going?"

"What do you do, anyway? I know you work for an advertising agency, but what do you do?"

"Just ad copy," evasively.

"Tennammy."

She was beside Peter again for a moment, but his eyes watched some figure across the room. It was Avia, whose cloth of silver molded to her figure as if she were a model created in the image of a goddess, and Avia looked lovely, doesn't she?"

He nodded quickly then brought his gaze back to her as if he were giving her for the first time. "Why didn't you get a new dress for the party?" His tone criticized her black line of last season.

"Why, I didn't think it was so important. Besides, I haven't had much time for shopping."

"Do you don't think the celebration of the finish of my first real work is very important?" he repeated, coolly. "Oh, of course—I did not mean it that way. Dear, it's the party that isn't important," she smiled into his eyes, but there was no response. He seemed to be pre-occupied, lighting a cigarette.

Avia hurried up to him. "Give it to me," she requested. "I haven't time to light one. And come in the other room with me a minute. I

## MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you use Dr. Werant's Powder—they fit snugly and comfortably. They are prescribed by the world's leading dentists. You can't lose 'em! Costs but little—any dentist.

Have something to tell you that I just heard from Uncle John about the exhibit. Excuse us please," she smiled, with sardonic sweetness, at Camilla, and took his arm possessively, as he transferred the lighted cigarette from his lips to her heavily rugged ones.

The room blurred for Camilla, whirled dizzily. It must be the heat, or the portion of a cocktail she had drunk—she must get outside. While out noise, she slipped along the wall to the door and into the hall outside, glanced about her and quietly opened the door into Peter's studio.

She would not be missed if she went in here for a while, where it was dark and dark, and she could cry a little to dissolve that horrible aching lump in her throat which threatened to choke her. She would not imagine what was the matter with Peter tonight. He was not himself and she wouldn't let herself be angry with him, she only wanted to be alone for a while to adjust herself and somehow let the evening pass. But she chided herself for this all right again.

Peter was only tired and anxious and, with an exaggerated sense of obligation to Avia, who had made him believe she had done a great deal of him. He would see everything through to the end. He would not let her down.

She closed the door and crossed the room to the armchair beside the window, where the immigrant group was shaped almost against the dim light. Here, Terry, take my wife. Terry was to dance. He would have been more considerate of Avia to let her rest instead of giving this party. I should think it would have been better to wait to celebrate when the prize is awarded.

She would take care of him and let him rest and relax. There were sounds at the door and it opened presently. Camilla looked straight at Peter, who stood behind her in the square of light from the hall. Camilla rose from her chair instantly, not trying to overhear what Avia was saying, and just as Peter reached over and turned on the lamp near the door.

As the light illumined the room, each of them exclaimed incoherently that they saw Camilla—and instantly, all three cried out at what the lamp light revealed to them. The aroused figure, "Inspiration," lay in shattered fragments on the floor around the pedestal where they had left it standing so proudly an hour before.

(To Be Continued)

## Esquimaux's Former Name

Naval Base Known As Inowonahyath Twenty Years Ago

Esquimaux, the naval base adjoining Victoria, was spelled "Inowonahyath" 20 years ago although the derivation of that name is unknown. The quaint spelling is shown on an original sketch map of Vancouver Island presented to the province of British Columbia by the governor and committee of the Hudson's Bay Company in London.

The map was drawn by Lee Douglas under the direction of James Lough, then governor of Vancouver Island. It gives the name "Camosack" for Port Victoria.

A word to the wise is said to be sufficient. Esquimaux, the name words people use in giving you advice?

Humans are slow to learn. Hens have been laying stream-lined eggs as long as anyone can remember.

Too Much Urlic Acid

Is a very common cause of Rheumatism, Sciatica, Lumbago, Dermagid, kidney trouble, and an amount of uric acid accumulates. Take Gink Pills to give relief while they are making your kidneys to function normally.

Flapper (looking nervously at small boy with dog): "Er, don't let him bite me, he's showing his teeth."

Small Boy: "Oh, you can't go by that, miss; you're showing your legs, but I don't suppose you'll kick."

Diner: "This isn't chicken broth, is it?"

Waiter: "It's chicken broth in its infancy. Sir. Made from the water the eggs are boiled in."

## Ruling Was Lasting

Speaker of House Banished Her From Parliament Hall

A. P. Herbert, the famous "A.P.H." Punch, a delightfully whimsical character, as Canadian newspapermen who have met him well know, "having the law" on the kitchen committee of the British House for selling information. It is a reminder of the ruling which was seen far-off, when he had a bar of our own up on Parliament Hill.

It wasn't much of a bar in size, and didn't have a rail for one's feet, but what it lacked in spaciousness it more than made up in other ways. One might get anything there, from a mint julep to Guinness's stout, and get it at any time from three o'clock in the afternoon until one hour after the rising of the House, which in those days, might be three o'clock in the morning.

'Twas a great aid to parliamentary civility, and an otherwise mild and inoffensive Demosthenes turned out a fair maiden speech under its inspiration, and many an obscure member was produced who would have delighted the heart of Parnell.

There was a known handwriting on the wall came for it with the Speaker's Bar. Dr. Sprout, that most lovable of Speakers, a strong man, much objected to the conviviality of the parliamentary bohemians being carried on so far that the night, especially as the bar was directly over the apartments where he slept, and he suffering from insomnia. So he cut every fourth that the bar must close the rising of the House, which, to tell, was a late enough closing for any one.

But it wasn't Mr. Speaker Sproule's most popular ruling. And we remember a ruling which the Speaker's Bar, rearing this onslaught on their personal liberty, used to get up processions and march up and down the aisle, the good Speaker's Bar singing the "Wearing of the Green," they knowing he was a Grand Granger.

A few years later, and there came prohibition. And the bar never came back—Ottawa Journal.

## Moving Reindeer By Motor

Seven Bells Taken From Sweden To French Frontier

Seven reindeer are being transferred from Sweden to the French frontier in a motor vehicle. They will not reach their destination until summer. They are in charge of two Swedes and a Lapp, who will care for them after their arrival until the experiment of transplanting is completed. The journey is being made in a motor vehicle, and long stops are made on the way to accustom the animals to the changes of climate. How they will thrive in the land of start summer night, instead of the silver twilight of Sweden, is a conjecture. Reindeer are bred in the French Pyrenees, and the experiment is to get them to settle there as much multiply. A similar trial was made some years ago, but the trip was made by boat and train, and the animals died.

## Using Small Potatoes

English Firm Proposes To Make Substitute For Flour

A company is being formed at Ely, England, for the manufacture of farina and dextrine from potatoes. In the past one of the problems of the potato grower has been to find a market for his under-sized vegetables, or "smalls." This new factory proposes to utilize them. They will grow the potatoes over a 1 inch ridge.

The new industry will consume 75,000 tons of this year's crop, and after two years will materially increase that figure. Farina, during the last year, was used as a substitute for flour. It is still extensively used in the manufacture of foodstuffs.

## Three Ottawa Seals Vacant

The death of Dr. William Spunkie, Conservative member for Frontenac-Addington, created the third vacancy in the House of Commons—ad on the government side. North York was left unrepresented by the death of T. H. Lennox and Toronto East by the death of Hon. E. R. Ryckman, former minister of national revenue.

Flapper (looking nervously at small boy with dog): "Er, don't let him bite me, he's showing his teeth."

Small Boy: "Oh, you can't go by that, miss; you're showing your legs, but I don't suppose you'll kick."

Diner: "This isn't chicken broth, is it?"

Waiter: "It's chicken broth in its infancy. Sir. Made from the water the eggs are boiled in."

## Ease Pain, Headache in Few Minutes

1. PEG, IN FRANTIC, THIS DISK MUST BE DONE—AND I'VE A SPLITTING HEADACHE

2. LATER

LOOK WHAT I'VE DONE, PEG—ASPIRIN TABLETS HAVE TAKEN THAT AWFUL HEADACHE IN A JIFFY—MYSELF FEELS BETTER!

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT—

I KNEW IT WOULD! THE QUICKEST SAFE RELIEF FROM PAIN KNOWN—

WHY ASPIRIN WORKS SO FAST

Drop an Aspirin Tablet on a glass of water. Note that B.F. bubbles rise to the surface. It is started to work. What it does is to dissolve in the water. Hence its quickness.

MADE IN CANADA

Does Not Harm the Heart

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest relief that is used, get discovered.

Aspirin Tablets are a scientific discovery by which an Aspirin Tablet begins to dissolve in two seconds after touching moisture. The illustration of the Aspirin Tablet in a few minutes after taking.

When you buy, though, be on guard, the night, especially as the bar was directly over the apartments where he slept, and he suffering from insomnia. So he cut every fourth that the bar must close the rising of the House, which, to tell, was a late enough closing for any one.

But it wasn't Mr. Speaker Sproule's most popular ruling. And we remember a ruling which the Speaker's Bar, rearing this onslaught on their personal liberty, used to get up processions and march up and down the aisle, the good Speaker's Bar singing the "Wearing of the Green," they knowing he was a Grand Granger.

A few years later, and there came prohibition. And the bar never came back—Ottawa Journal.

## Cannals Stamps Auctioned

Exceedingly Rare Specimens Sold For Seven Thousand Dollars

Seven thousand dollars for two little pieces of gummed paper, that is less than two inches square. That is what happened at a sale-room in Bond St. W., London, recently.

True, the little pieces of paper are dignified by the name of stamps. They were two of the 363 issues of Canada, valued 24 cents and bearing a charming portrait of Queen Victoria in her early womanhood.

These stamps, described as "superb in every respect and exceedingly rare," were items in the collection of the late Arthur Hind, of the United States.

The removal of the collection brought buyers and commissions from all parts of the world, and in the sale-room were people whose names are familiar wherever stamp collecting is discussed. Messrs. Stanley Gibbons, F. B. Smith, T. Allen, R. Roberts, L. Aaron, H. Nissen, L. Gill, Joubert.

Experienced men of the world though they are, and doubtless acting on commission for clients, they were as excited as a pack of school boys about the treasures displayed before their eyes.

There was a lively. That for a block of four Newfoundland stamps at \$1,250, and rose to double that sum.

Then there was what was described as "an immaculate pair" of cold violet Nova Scotia stamps, used on an envelope, and with a yellow-green. This fetched \$2,300, but a prominent expert said afterwards that the collectors would not consider themselves robbed if they were asked \$2,500 for this pair, because there is hardly any doubt that another such pair does not exist in the world."

PAUL'S SERVICE STATION

Mrs. H.C. Barr, of Field, B.C., was  
a Carbon visitor on Friday last, gather-  
ing up her furniture which she had  
stored around town.Bill Poole brought Tom Ramsay and  
Ruth out from Calgary on Saturday.  
Tom is getting along splendidly follow-  
ing his recent operation for appendi-  
citis.A hail storm passed over town and  
to the north east on Monday afternoon  
and considerable damage was done to  
the gardens, but the wheat escaped  
in most cases. The storm did not go  
south of town.A number of friends in the district  
gave a surprise party for Mr. and Mrs.  
Ross Thorburn at their home on Sun-  
day, June 8th, the occasion being their  
silver wedding anniversary. Mr. and  
Mrs. Thorburn were presented with a  
silver tray in honor of the occasion.Mr. and Mrs. Harley Davidson spent  
the week end in Calgary.A. F. McKibbin left for Edmonton  
on Sunday to attend the pharmaceuti-  
cal convention. He will also take in  
the Grand Lodge meeting before re-  
turning home.Miss K. Graham spent Sunday and  
Monday visiting at her home in Cal-  
gary.Mr. and Mrs. Adam Bertsch and  
family motored to Calgary on Satur-  
day and visited with Otto Gittel and  
Ed Stohel and families. They returned  
Sunday.The W. A. of Carbon will hold a  
tea and Strawberry Social in the  
Pamphlet Exchange hall, Carbon, on  
Saturday, June 16th, from 2 to 10 p.m.  
Everybody welcome.Roy Schultz has taken a position as  
airman hayer for the Western Canada  
Flour Mills at Champlain.Mr. and Mrs. Emmanuel Bertsch motored  
to Calgary on Saturday.The fourth annual basket picnic and  
field day of the Avondale Shortburn  
Club will be held at the E.P. Ranch,  
west of High River, on Saturday, the  
14th of June. A cordial invitation is  
extended to all.Fourteen thousand eight hundred and forty-three happy holidaymakers can't be wrong, or so the  
Canadian Pacific Steamships expect to prove this summer with four short sea cruises by the  
Duchess of Richmond between Montreal and New York.During the last three summers two Duxbury liners have made between them eleven of the nine  
day trips, the popularity of which has been shown by the fact that 14,842 passengers were carried on  
these vacation cruises.The Duxbury of Richmond's cruise departures from Montreal will be on July 21, July 31, August  
10 and August 20, and from Quebec the evening of the same day. Sixteen hours will be spent in New  
York on July 25, August 4, August 11 and August 24, with return to Montreal on July 30, August 9,  
August 15 and August 25. The day prior to arrival in Montreal eight hours will be spent in Quebec,  
with opportunities and facilities provided for exploration of the Ancient Capital and surrounding  
districts such as the Cote de Beaupre, with its famous shrine of St. Anne. Subsequent trips in New  
York will also be arranged for those who wish to take them.All the "Duxbury" such as characterizing a beach-ship cruise have been planned for the Duchess  
of Richmond's nine day cruises, and each day of the trip down the majestic St. Lawrence and around  
the scenic coasts of Nova Scotia and New England will be a complete experience in itself.Facilities for enjoyment, both in exercise and relaxation, include an open-air swimming-pool, a  
gymnasium, deck-tennis, horse-racing, shuffleboard and many other sports, and also the opportunity  
for lay day-sightseeing, for which no better medium can be found than a comfortable deck-chair on  
a long sunny afternoon.William Webb, who has directed all previous "Duxbury" cruises to New York, will again be  
cruise director, and all manner of entertainment and enjoyment arranged for the cruise members  
will be provided under his direction and that of the staff. The Duxbury of Richmond will be  
in command will be Captain Arthur Rowland, formerly of the Duxbury of Richmond, and  
recently appointed to the Duchess of Richmond.Miss Margaret Smith of Acme was a  
Carbon visitor this week.A number of Carbon people attended  
the funeral of the late Mrs. Mc-  
Nichol in Calgary on Wednesday.Mrs. Morris of Port Huron, Mich.,  
who has been visiting her uncle, Stew-  
art, left, spent last week end visiting  
at the home of Mr. and Mrs. Andrew  
Walker.On Saturday, June 16th, the Red  
Bus Lines will run a special bus to  
the E.P. Ranch, near High River,  
where the annual picnic of the Short-  
burn Club is being held. Those wish-  
ing to take in the trip should make  
application immediately to Red Bus  
Lines. Round trip fare will be \$1.50.Messrs. P. Edwards, W.A. Hirschler,  
W. Poxon, S. F. Torrance and J. C.  
Smith (Acme) motored to Edmonton  
on Tuesday to take in the Grand  
Lodge meeting. They expect to return  
Friday of this week.Jas. Briel of Calgary spent a few  
days in Carbon this week on business.We understand that four local men  
have been accepted under the back-  
to-the-land relief scheme, and that  
they will leave shortly for their farms  
in the Peace River district. These men  
are Messrs. G. Hirschler, A. Moore, F.  
Gibson and J. Harmon.W. H. Williamson who was confined to  
the Drumheller hospital for a week  
returned to Carbon on Saturday and  
is again on duty at the C.P.R. depot.  
Mr. A. McVie Anderson, of Ander-  
son and McLean, Right Street, Carbon,  
will make his next visit to  
Carbon on Tuesday, June 19th, for the  
morning only, at McNichols' Drug  
Store. Make appointments early.Mr. and Mrs. H.C. Wilson motored  
into Calgary on Tuesday evening.Rev. Wm. McNichol will speak on  
"The Kingdom of God, or What the  
Bible Teaches on Economics" at the  
United Church, Carbon next Sunday  
morning.
